

Epidemiology and Clinical Outcomes Research Seminar Series

*Presented by the Division of Public Health Sciences,
Department of Surgery*

Jorge E. Chavarro, MD, ScD

*Assistant Professor of Nutrition and Epidemiology, Harvard School of Public Health
Assistant Professor of Medicine, Harvard Medical School*

**Thursday, October 10, 2013
4:30 p.m. in The Doll & Hill Teaching Room
Taylor Avenue Building**

"Studying the Transgenerational and Developmental Origins of Chronic Disease"

Increasing evidence suggests that in-utero and early-life exposures may be important in the development of breast cancer and some reproductive disorders. Examining this hypothesis poses logistical challenges, most notably the long latency period between exposure and outcome. This seminar will discuss some strategies that can be used to tackle this issue in epidemiologic studies (within the lifetime of a single investigator) and discuss their relative strengths and limitations.

Co-sponsored by the Institute for Public Health, the Department of Obstetrics and Gynecology, the Department of Medicine, and the Department of Anesthesiology
